SUMMARY

Full-stack developer skilled in Python and Django REST Framework, with hands-on experience designing secure REST APIs and scalable backend systems. Proficient in HTML, CSS, and JavaScript for developing responsive user interfaces. Focused on building clean, maintainable, and efficient applications.

TECHNICAL SKILLS

- **Backend:** Python, C, C++, JavaScript, Node.js
- **Frameworks/Libraries:** Django, Django REST Framework, NumPy, Pandas, OpenCV, MediaPipe, Pillow, PyTorch
- **Frontend:** HTML, CSS, JavaScript, React
- **Database:** PostgreSQL, MongoDB, Firebase (Firestore / Realtime DB)
- **Deployment & DevOps:** Vercel, Firebase Hosting, Netlify, GitHub Pages
- **Tools:** Git, REST APIs, JSON, Postman, Figma, GitHub

WORK EXPERIENCE

Full Stack Developer, Hiremaze

Sep 2025 - Mar 2026

- Reduced API response time by ~20% through optimized query handling
- Strengthened authentication mechanisms, minimizing unauthorized access risks
- Designed scalable backend workflows supporting multi-user operations
- Built and optimized responsive frontend components using React, enhancing user experience and reducing UI load time

EDUCATION

World College of Management and Technology

Sep 2024 - Present

- B.Tech – Artificial Intelligence & Machine Learning

PROJECTS

Novel Cult

(<https://novelcult.site>)

- Engineered a full-stack novel discovery and review platform using Firebase Authentication and Firestore
- Implemented user authentication and dynamic content rendering for seamless reading experience
- Designed responsive UI for browsing and rating novels

Discord Bot

(GitHub: <https://github.com/Wandering-Spirit-22/your-bot-repo>)

- Created a Python-based Discord bot using discord.py featuring moderation, utility commands, and interactive features
- Automated server management tasks and enhanced user engagement

HirePix (Internship)

(<https://hirepix.in/>)

- Contributed to a full-stack recruitment platform using React
- Built responsive UI components supporting scalable hiring workflows

HireMaze Backend (Internship)

(<https://hiremaze.in/>)

- Developed REST APIs using Node.js, Express, and MongoDB for a recruitment consultancy platform
- Implemented efficient database schemas and API endpoints

Portfolio Website

(<https://wandering-spirit-22.github.io/portfolio/>)

- Crafted a Murim-themed portfolio with advanced animations and dark UI aesthetics
- Built using HTML, CSS, and JavaScript with focus on performance and user experience

ADDITIONAL INFORMATION

- **Technical Skills:** Backend Development, REST API Design, Web Development
 - **Certifications:** Programming languages, hackathons, and technical workshops
 - **Activities:** Participated in 4+ hackathons
-
